Suzanne - FYI - See Doug's comment below about wanting a conversation on the upcoming "energy forum" (I think he is referring to the O&G National Roundtable). Organization of this meeting to-date has been done by Jim Kenney of OECA with a huge lift by ECOS so far who has the ability to convene and has provided the agenda. I'm back in office tomorrow.

I can't access this document. Does it answer all my questions below? Also, I'd like to have a conversation about the upcoming energy forum. Instead of HQ providing us with information about that meeting in our region I would prefer you take on that responsibility.

Martin, can you have air put together some background on Utah air issues for me tomorrow. In particular an update on regional haze, Utah SIP preparation, etc. I was reviewing some of the clips out of Utah over the past several months and it seems like there has been a lot of activity.

What I'm looking for is an explanation of the issue, procedurally where the matter stands (e.g. we're reviewing something they submitted to us, they're preparing something for us to review) when the next deadline or activity will take place. It doesn't have to be extensive, a page or two is fine.

Cindy, thanks for preparing more background for my NSPS OOOOa discussing with the Administrator next Friday. As discussed if you would provide me a memo outlining the issue, R8 specific issues/concerns with the proposal and also any impact it would have on the U&O FIP we are working on. If I could have that Wednesday so that we could talk about it Thursday I would appreciate it.

If you have questions please let me know.

Thanks,

Doug
